Executive Summary

I am a dynamic and results-driven Technical Project Manager with over five years of experience in project management and front-end development. Backed by a strong technical foundation, including a Full-Stack Web Development certificate from Rutgers University and Apple certifications, I specialize in leveraging Agile methodology to deliver projects on time and within scope. My leadership skills and technical expertise allow me to guide teams in creating engaging, user-centric websites that enhance client satisfaction and drive results.

Work Experience

Sesame Communications

Technical Project Manager

Seattle, WA / Remote

2021 - Aug 2024

- Implemented tailored website solutions for dental practices, ensuring strict adherence to HIPAA compliance standards throughout development.
- Developed and executed comprehensive website designs for dental practices, resulting in increased online visibility and patient engagement; achieved 30% growth in website traffic and 25% increase in bookings.
- Managed and coordinated with a team of 3 designers and 6 developers, ensuring that all projects were completed according to specifications and timelines.

MWNY

Front End Developer Lead (Freelance)

New York, NY / Remote

2020 - 2022

- Designed a new website layout from the ground up using WordPress.
- Created and refined a collection of 4 Photoshop templates, offering the client diverse design options.
- Conducted market research and competitor analysis to identify key design elements for new web presence, enhanced client satisfaction by 40%, and reduced project turnaround time by 20%.

Jstorm2594 - Twitch Streamer

Front End Developer (Freelance)

Jersey City, NJ / Remote

2020 - 2021

- Collaborated with J-storm to revamp and enhance outreach to new followers.
- Initiated industry-standard tools and technologies to optimize website performance.
- Designed a custom website for J-storm, incorporating branding elements, website traffic engagements, and increased viewership.
